Experience

Amdocs

July 2024 – Present

Software Engineer

Pune

- Developed Java 11+ and Spring Boot microservices using Maven build pipelines with JUnit test coverage, deployed on Docker in AWS cloud environments across two delivery tracks – SVO (B2C service activation) and PO (Project Orchestrator – infrastructure rollout), contributing to multiple production releases.
- Worked on core orchestration logic for B2C service activation flows covering Fiber, Copper, ADSL, VoIP, and IPTV – including Number Management, Modify OSP, Modify PAN / Switch VRF and Effective Billing Date of plans.
- Authored and aligned MEC (Master Element Configuration) definitions across several features driving rule-based decomposition of customer orders.
- Implemented REST consumers, event subscribers, activity hooks, and customizations integrating with downstream systems including network inventory, billing, and provisioning platforms.
- Resolved several production bugs across the fulfillment stack and stabilized critical fallout flows improving order completion rates

Indian Oil Corporation Ltd.

May 2023 – July 2023

App Dev Intern

Kolkata, WB

- Took a pivotal role in the creation of the Hall Booking Software utilizing the React Native framework, and implemented the backend using Node.js and MongoDB.
- Successfully delivered an efficient app that facilitates conference room reservations for the IS department of IOCL, contributing to enhanced operational effectiveness.

Projects

Komorebi | ReactJs

- Empowered visually impaired students with tools for enhanced note-taking and reading accessibility.
- Implemented object detection and recognition capabilities using Tensorflow and Coco-ssd module. Integrated text-to-speech and speech-to-text functionalities through the SpeechSynthesis API in JavaScript.
- Enabled users to efficiently create and listen to notes, books, and PDFs, promoting effective learning.

Effective Billing Date Feature | Java, Spring, REST APIs, Java Stream API, Maven, JUnit

- Designed and developed the Effective Billing Date (EBD) computation feature for the PLDT B2C residential service activation flow as part of the OSS transformation program. The feature ensures that the customer's billing cycle starts on the correct activation date across multi-service orders (Internet, VoIP, IPTV, Wireless).

Eat-n-repeat | React Native and APIs, community modules

- Developed a mobile app that allows users to search for restaurants based on location and any query.

Education

VIT Vellore

2020 - 2024

Bachelor of Technology in Computer Science

Vellore, Tamil Nadu

Technical Skills

Languages and Frameworks: Java, Spring Boot, Spring MVC

Technologies: React Js, React Native, HTML, CSS

Tools and cloud: AWS, Git, Docker, Kubernetes, Jira, Confluence, Jenkins

Database: SQL

Build Test: Maven, JUnit, Node.js

Domain: Telecom OSS, Service Fulfillment, Network Inventory

Core skills: DSA

Achievements

AWS Certified Solutions Architect - Associate
